SUMMARY

Senior Solution Architect with 18 years of experience in designing and delivering scalable, enterprise-grade solutions. Expert in .NET Core, Angular, React, Node.js, and cloud platforms, with a proven record of leading teams, driving innovation, and building high-quality applications. Skilled in DevOps, API development, Agile, and database management, with strong problem-solving and leadership abilities. Known for delivering secure, efficient, and future-ready solutions that align with business goals and consistently exceed expectations.

SKILLS

Programming & Frameworks: C#, .NET Core, Expert C# Development, Expert .NET Core Development, JavaScript, TypeScript, Advanced TypeScript, Angular, Advanced Angular Development, React.js, Intermediate React.js Development, Node.js

Database & API: SQL Server, Advanced SQL Server Management, REST API, Advanced REST API Design

Cloud & DevOps: Cloud Computing, Intermediate Cloud Computing Solutions, DevOps, DevOps Practices, CI/CD, CI/CD Pipeline Implementation, Azure Messaging Services (Service Bus / Event Grid / Event Hubs)

Methodologies & Practices: Agile, Agile Methodologies

Core Competencies: Problem-Solving Skills, Team Leadership

AI & Generative AI Technologies: OpenAI API Integration, Gemini API Integration

EXPERIENCE

LanceSoft Inc. (Remote)	Delhi, India
Senior Solution Architect Full Stack Developer	Jun 2022 - Jul 2025
· Architected and developed an enterprise logistics management system using .NET Core and Angular 20, improving operational efficiency by 30% and integrating Linehaul, ECD, and Asset Management into a unified platform.	
· Led a team of 8 developers, managing a \$500,000 budget, and ensured cost-effective delivery with scalable, maintainable, and modular system design following microservices and SOA principles.	
· Optimized Oracle database performance by 25% through PL/SQL enhancements, query tuning, and effective use of SYS_REFCURSOR in .NET Core data access layer.	
· Implemented real-time ECD features for dispatching, route tracking, and equipment monitoring, leveraging SignalR for live updates and reducing equipment downtime by 15%.	
· Enhanced user satisfaction by 20% by building a modern, responsive UI using Angular 20, TypeScript, and RxJS, replacing legacy JavaScript/jQuery interfaces for improved user	

- Architected and implemented a MERN -based solution leveraging React, Node.js , and RESTful services for high -performance user interactions.

Senior Consultant | Full Stack Developer

- Designed and developed a role -based Learning Management System (LMS) using .NET Core 5 and Angular 11, boosting course completion rates by 40%.

- Implemented RESTful APIs and modular architecture, improving backend communication efficiency by 35% and ensuring scalability.

- Engineered Role -Based Access Control (RBAC) for Administrators, Learners, and Managers, enabling secure, context -aware feature access.

- Enabled compliance tracking with 99% accuracy through course assignment and learning path monitoring, while improving navigation efficiency by 20% via dynamic menu generation.

- Applied security best practices (authentication, session management, data validation), mitigating risks by 95%, and contributed to Agile ceremonies and code reviews for continuous improvement.

Noida, India

Sr Software Engineer

Nov 2015 - May 2021

- Developed document management solutions with SharePoint Online, Power Apps, and Power Automate, cutting processing time by 50%, automating approval flows, and ensuring governance compliance.

- Built an Extended Warranty Claim System using .NET Core, Angular 8, REST APIs, and SQL Server 2017, handling 10,000+ claims annually and reducing errors by 15% through advanced validation workflows.

- Integrated enterprise platforms by designing role -based SharePoint forms and connecting SharePoint 2013 with Collibra via REST APIs, improving data accessibility by 30% and enhancing cross -platform governance.

I have also worked at Plasma Softech and Izon Technosoft as Software Engineer from 2007 to 2015.

M. Sc. Computer Delhi, India

Karnataka State Open University (KSOU)

Jan 2013 - Jan 2014

BCA in Computers

DELHI, India

IBME

Jan 1999 - Jan 2002

· Exam 339: Managing Microsoft SharePoint Server 2016 Microsoft · Jan 2019.

- Mentor/coach for junior developers on modern application design and Agile practices.

OTHER PROJECTS

Inventory & Order Management System (SIOMS) Delhi, India

Senior Solution Architect | Full Stack Developer Jul 2025 - Jan 2026

- Developed a Smart Inventory & Order Management System using .NET 9 , Angular 20 , TypeScript and SQL Server 2022 , enabling seamless product, supplier, and order tracking with role - based access.
- Implemented Clean Architecture Microservices with CQRS , Repository , and Unit of Work patterns, ensuring scalable, modular, and maintainable codebase.
- Built secure RESTful APIs with JWT authentication , Fluent Validation , and AutoMapper , improving data integrity and reducing manual errors.
- Designed a responsive Angular Material dashboard with real -time alerts, analytics, and interactive charts using ngx-charts and Reactive Forms .
- Integrated Serilog for centralized logging and background services for automated low -stock alerts, optimizing inventory accuracy and operational efficiency.

AI-Powered E -Commerce Platform Delhi, India

Senior Solution Architect | Full Stack Developer Jul 2025 - Jan 2026

- Developed a full -stack e -commerce platform using MongoDB, Express.js, React 18, and Node.js , deployed on AWS infrastructure with EC2 for application hosting and S3 for static asset storage, providing product search, cart, order management, and secure JWT-based authentication .
- Built hybrid RESTful and GraphQL APIs to support flexible data queries and efficient client -side rendering for dynamic product listings and user dashboards, containerized using Docker and deployed via ECS (Elastic Container Service) for scalable microservices orchestration.
- Integrated Redis caching for frequently accessed catalogue and recommendation data, reducing average API latency by 40% and improving overall system performance, with background processing and event -driven workflows handled through Lambda functions .
- Implemented AI-powered recommendation engine using OpenAI API / TensorFlow.js , deployed as serverless inference endpoints using AWS Lambda , offering personalized product suggestions based on user behaviour and purchase history.
- Designed an intuitive React UI with Context API and React Router , hosted frontend build artifacts in S3 with secure access policies, integrated Stripe for secure payments, and enabled role -based admin panel for product and order management.
- Configured AWS IAM roles and security groups, implemented CI/CD pipeline for automated deployments to EC2/ECS , and monitored application health using CloudWatch to ensure high availability and production -grade reliability.
